Description:

This collection of 5,000 designs from Thomas Wilson's drawing notebooks harvests the creative output of four decades of ironwork design. Wilson—ironwork designer, master blacksmith, artist, sculptor, illustrator, author, and restorer—is at the forefront of design in metal. The designs here demonstrate the core role that drafting and drawing play in artistic work. Rendered on everything from notebook pages to paper napkins, they range from traditional to wildly creative. This volume incorporates the best of all that Wilson's eyes and mind have absorbed, and offers inspirational creative reference for anyone interested in design. Some of the drawings are spontaneous, simple idea sketches; others are fully evolved renderings of works of art. From chairs to hinges, chandeliers to fences, benches to belt buckles, the images will inspire design professionals, architects, interior designers, art students, blacksmiths, ironwork enthusiasts, jewelers, and artists of all kinds.

This is an excellent project source book. There is clear evidence the author had a tremendous amount of work in this volume. I have found it useful immediately in my shop. There is minimal text and it is primarily comprised of well executed sketches showing numerous variations of many projects. This has been a fine addition to my shop library.
